

Dementia Help Now Phone App: Quick Setup Guide for Android

01.

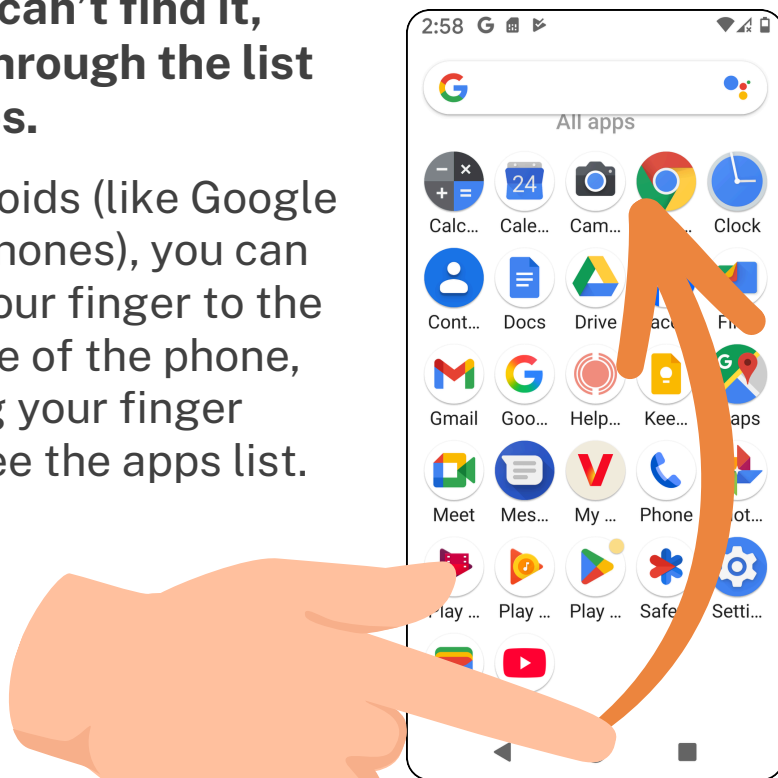

Find the “Play Store” app on your phone and press it. It looks like this:

02.

If you can't find it, look through the list of apps.

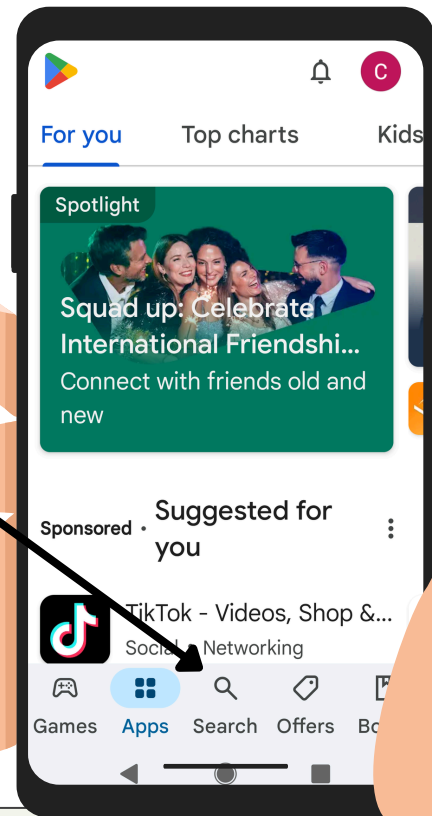

On most androids (like Google & Samsung phones), you can press down your finger to the bottom middle of the phone, and then drag your finger upwards to see the apps list.

Dementia Help Now Phone App: Quick Setup Guide for Android

03.

Once the Play Store is open, press the “search” button, and type “Dementia help now”

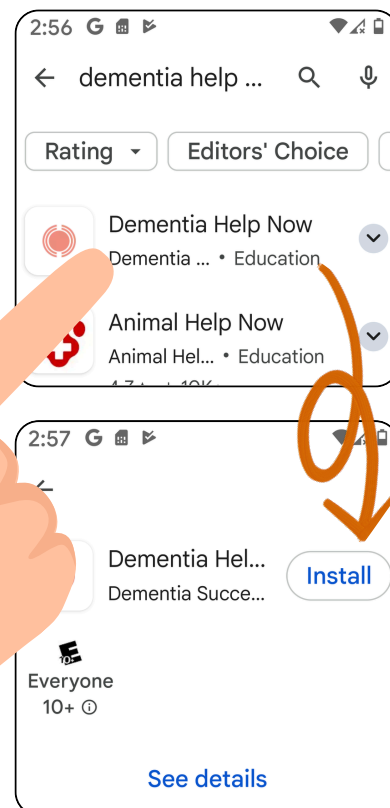

04.

Verify our logo and then press the button that says “Download” or “Install”.

You may need to wait a minute for it to finish downloading and install. The button will change from “install” to “open” once the app is ready.

Do not spend money - it's free to download. Make sure you are seeing this logo:

05.

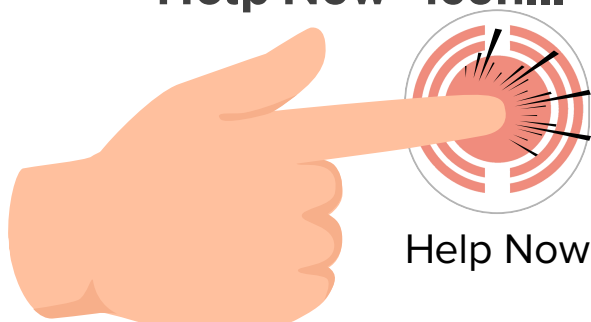

After installing, find it in your apps list if you don't see it on your home screen.

On most androids (like Google & Samsung phones), you can press down your finger to the bottom middle of the phone, and then drag your finger upwards to see the apps list.

06.

Then, press and hold down on the "Help Now" icon...

Help Now

...and then select "Add to Home" (or a similar option) so it shows up with the other apps you see when you normally open your phone.

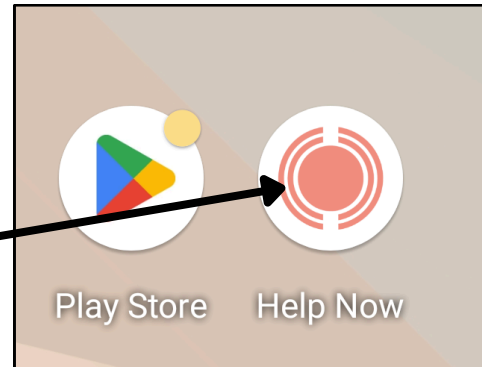

Add to Home

Dementia Help Now Phone App: Quick Setup Guide for Android

07.

Once its on your home screen, go ahead and select it

08.

Then enter the email associated with your Dementia Caregiving Made Easier membership to use the app.

You do not need your password - the app will check the email you enter to see if it is associated with an active membership, and if it is, you'll get right in!
